### Abstract

In this lecture, the failures of PLV and the ways to avoid them will be discussed and also the treatments of failures in case of happening will be introduced.

These failures include:

- Esthetic failure
- Smile design failure
- Incorrect tooth select
- Wrong tooth prep
- Crack (lab)
- Adhesive problem
- Luting problem
- (viscosity/color change)
- Lack of marginal fit
- Biologic failure
- Perio problem
- Post operative problem
- Incisal failure
