**Title:** Practical model of education of Attitude  
**Authors:** Bilan Nemati

Abstract: Attitude is ignored Domain of our education, and teachers do emphasize on Knowledge in the terms of recall. The Attitude is a field in which the students learn it by self learning and self-interpreting and that is why there are different uptakes from one fact. We have included Attitude in our educational plan and at the beginning of course and in a workshop, transfer the necessity and different aspect of it to students. They have a logbook and record their achievements about attitude on it and report in morning reports.

Conclusion: if we include the Attitude in curriculum and follow it, can conduct the student to a deep comprehension of it and make it an essential part of their life.
